Subject:Public comment 2. Mitsui & Co. A Tamotsu 5-26-14

Dear BIS,

This refers to the Federal Register 79 FR 27417 dated May 13, 2014, titled, "Revisions to the Export Administration Regulations (EAR) : Control of Spacecraft Systems and Related Items the President Determined No Longer Warrant Control Under the United States Munitions List (USML); Final Rule."

On this occasion, I'd like to make a comment/request on the License Exception TSU as follows:

In section 740.13 you previously added new paragraph (f) under which you now allowed release of technology and source code in the U.S. universities to their bona fide and full time employees using License Exception TSU. This is somewhat unfair from the point of view of foreign re-exporters. So we would request you to expand the scope to cover not only the U.S. universities but also those in foreign countries including Japan.

Please note that this request was once made to your Mr. Borman when I met him at a BIS office in Washington in January this year as a member of CISTEC delegation. He responded to me that we provide a formal request to expand the License Exception TSU to include foreign universities during the continuing process of your EAR review.

Hope the above request be duly taken into your consideration.

Best regards,

Tamotsu Aoi
